## SPRINKLERS

- Sprinkler Irrigation is a unique system of applying irrigation water which is as such as rainfall. It is designed to ensure maximum water saving. Water is distributed through a system of pipes usually by pumping. It is then sprayed into the air and irrigated entire soil surface through spray heads so that it breaks up into small water drops which fall to the ground.
- Sprinklers provide efficient coverage for small to large areas and are suitable for use on all types of properties. It is also adaptable to nearly all irrigable soils since sprinklers are available in a wide range of discharge capacity.
- All sprinklers undergo extensive quality testing in our well equipped state of the art lab. Moreover, performance of the products are also tested in the field to ensure uniform water distribution and higher efficiency
- Suitable for all field crops like Wheat, Gram, Pulses as well as Vegetables, Cotton, Soya bean, Tea, Coffee, and other fodder crops, Residential, Industrial, Hotel, Resorts, Public & Government Enterprises, Golf Links, Race courses etc..
- Features: Durable, heavy duty, all brass construction. Stainless Steel spring and fulcrum pin Chemically resistant teflon washers. Dual nozzle. Corrosion resistant. Built to last.
- Primary Application: All overhead irrigation, hand lines, solid sets, permanent sets or mechanically moved systems.

## SERVICE SADDLE

- Mild Steel service saddle is manufactured using M S Sheet of 3mm.
- These Service Saddles are used in branch connections for PVC/HDPE/PP pipes in Irrigation , Industries, House service connections, etc.
- The service saddle is used for joining long distance irrigation pipes. It is also used for connecting the branches of , HDPE, PP and PVC pipes that are used while various irrigation processes and in house service connections.
- Longer lasting & Economical
- Maintenance free

### SPECIFICATION:

- Bolts: - M.S. (Zinc Plated)
- Size Range: - From 40 mm OD to 160 mm OD
- Connection (Branch) Size: - from  $\frac{3}{4}$  " to 2  $\frac{1}{2}$  "

## Quick Riser Couplers (QRC)

- Available in two sizes  $\frac{3}{4}$ " & 1  $\frac{1}{4}$ " in Aluminum & PP Body.
- Unit easy to handle, maintain and install, comprising.
- QRC is used for quick removal and reinstallation of sprinkler riser assembly. Prevents waste of water & are connected to a water source and buried with the top flush with the ground.
- Risers are connected to a Main water source . Flow starts as soon as the riser Adoptor is inserted into the Quick Riser Coupler water starts coming out through the Sprinkler fitted in the Adoptor.
